

I came across your job posting for the **Senior Backend Engineer** position at Talisman, and I am very interested in applying.

I have several years of experience in backend development, mainly with **Java, Spring Boot, AWS, and microservices**, and I have also worked in the **banking/fintech industry** leading projects to modernize legacy systems. I am confident that my background in designing scalable systems and mentoring teams would be a strong match for this role.

Before applying, I would like to confirm a few details:

- What is the expected **salary range** for this position?
- Do you provide **visa sponsorship** and **relocation support** for candidates who are not yet based in Japan?
- Is it possible to apply if I currently reside outside Japan?

Thank you for your time and consideration. I look forward to your reply.
